## Amendments to the winning project Modifications du projet retenu

The Berlin Wall fell a few months after Richard Rogers' project had been selected. As the former communist bloc countries were set to join the Council of Europe, the initial project, which had become too small even before work began, had to be amended.

The architect added a fifth and sixth floor and extended the wings of the building where the offices were to be located. As a result, the surface area of the building increased from 22,500 sq. m to 28,500 sq. m.

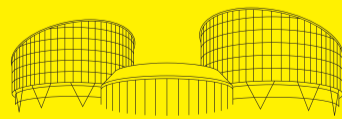

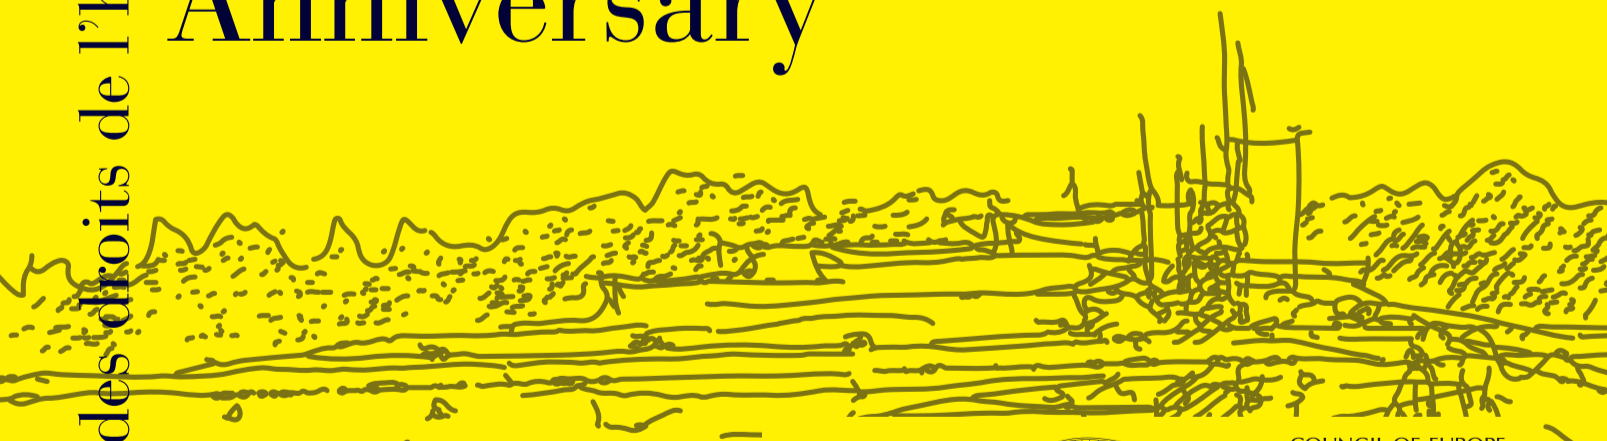

*Le mur de Berlin est tombé quelques mois après le choix du projet de Richard Rogers. Les Etats de l'ancien bloc communiste allaient adhérer au Conseil de l'Europe, et le projet initial, devenu trop petit avant même le début des travaux, dut être modifié.*

*L'architecte a ajouté un 5<sup>ème</sup> et un 6<sup>ème</sup> étage et a rallongé les ailes du bâtiment devant abriter les bureaux. La surface du PDH est ainsi passée de 22 500 m<sup>2</sup> à 28 500 m<sup>2</sup>.*
